

PortalX

Rewiring Collaboration

About PortalX

A comprehensive Intranet portal is one of the building blocks of Digital Transformation, nurturing employee engagement and facilitating strategic business decisions.

- However, building an Intranet portal from ground up can consume 4–7 months.
- PortalX, from the Cybage Innovation Hub, reduces Go-Live time to as little as 3–6 weeks.
- PortalX is a ready, out-of-the-box Intranet solution accelerator built on Microsoft SharePoint, and deployable at the client's environment.

If you aspire to ride the Digital Transformation wave, it's time to rewire collaboration with Portal X!

A PortalX Work-day

CXO

Takes the call on buying/implementing an Intranet solution

? It's taking ages to implement even incremental changes on the Intranet portal! I wish we had a faster solution.

💡 PortalX Accelerator

HR

Organizes content pertaining to policies and processes on the Intranet portal

? I need a communication model to streamline the dissemination of information.

💡 Centralized Document Repository

Intranet user

Uses the portal for various purposes such as submission of timesheet and IT proofs, and collaborating on projects

? This portal is so disorganized! The simplest of tasks take up too many clicks.

💡 Engaging UI, Chatbot

Administrator

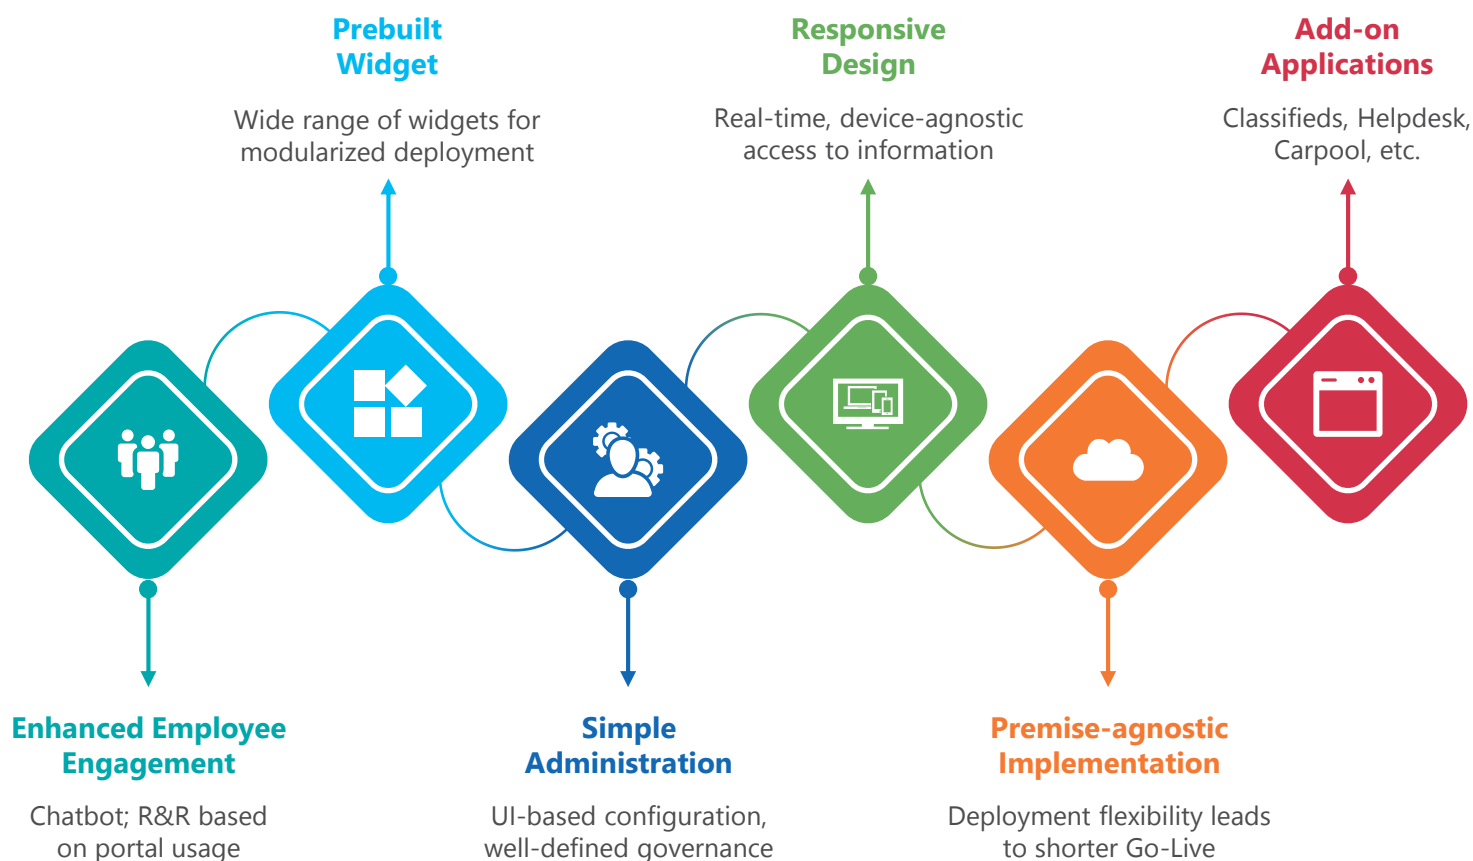

Administers the Intranet portal in the organization

? How do I ensure seamless portal management?

💡 Well-defined Governance

Solution Highlights
